Creating Quality Life

We are grateful that our consistent delivery of quality work results in longstanding trust and appreciation from our clients and partners. Therefore, VIVERE Group is committed to creating quality work for the long future ahead and extend its impact to the community and the environment.

INITIATIVES

We aim to create quality life for all. Through several initiatives, we hope that our work also play a role in advancing the interior and furnishing industry as well as improving lives in the community and the environment.

VIVERE SME Development Program

There are so many business opportunities and so many local craftsmen with the capacity to produce quality products, yet they lack the ability to utilize those opportunities in order to develop and market their products.

VIVERE SME Development Program is our initiative that provides small and medium local enterprises in the industry with the necessary skills and knowledge in order to survive, expand and grow sustainably.

The same spirit of empowerment is also evident in VIVERE Lokal Initiative, a collaborative collection put together through sourcing, idea-ting, design processing and selecting local artist's products from all over Indonesia, consisting of best quality products of international standards and reliability.

VIVERE for Education

Through solid partnerships with Indonesian universities, we facilitate bright students from less privileged background in pursuing their education by awarding them full scholarship and living cost allowance.

VIVERE Learning Center

In 2017 we started VIVERE Learning Center, an institution that organizes educational activities, trainings and professional certifications with the goal of improving the quality of human resources in the interior and furnishing business.

Partnering with several institutions in Indonesia and overseas, VIVERE Learning Center also conducts researches and developments for the advancement of the industry in terms of business, science and technology.
